10. The affidavit or other evidence is entered. An explanation REQUEST FOR RECONSIDERATION/OTHER	•		•		
<ol> <li>The request for reconsideration has been considered bu See Continuation Sheet.</li> </ol>	t does NOT place the application in	n condition for allowa	nce because:		
12. Note the attached Information Disclosure Statement(s).	(PTO/SB/08 or PTO-1449) Paper N	lo(s)			
10. [ Other		Allen C. Ho, Ph.D. Primary Examiner Art Unit: 2882	46		

U.S. Patent and Trademark Office PTOL-303 (Rev. 7-05) Continuation of 11. does NOT place the application in condition for allowance because:

Applicants' arguments are not persuasive. The applicants argue that Popescu disclosed a detector, whose curvature is related to the distance from rotational center to the detector, rather than the distance from the radiation source to the center of the detector. The examiner respectfully disagrees. Even though the detector disclosed by Popescu is shown to be concentric about the rotational center, it has a curvature about the radiation source. In the specification, the radius of curvature of the detector (18) at a point (130) is given by x+y, which is the distance from the radiation source to the detector. Similarly, there exists a radius of curvature, measured from the radiation source to the detector, for the detector disclosed by Popescu. Since this radius of curvature is just a real number, it must be proportional to the radius (16) of curvature of the collimator (13, 14). Therefore, the collimator disclosed by Popescu has a curved contour proportional to a contour of the detector.

The rejections are being maintained.
